To Whom It May Concern:

We are commercial General Contractors, specializing in retail construction with emphasis on supermarkets. We have used Clemmer Brothers for placing and finishing virtually all of our flat concrete work for the past 20 years. They are knowledgeable and have the capabilities of placing and screeding concrete to achieve the flatness that we require in supermarket construction. They will maintain a slump that will achieve design strength and minimize cracks from shrinkage. We have a reputation for quality flat work, both in appearance and structural integrity and they are an integral part of the team responsible for maintaining that reputation. We use them exclusively for placing and finishing our concrete flat work and highly recommend their work to others.

A handwritten signature in black ink, appearing to read 'Walter Boatner', written in a cursive style.
